

GOVERNOR'S OFFICE OF EMERGENCY SERVICES  
Exempt Duty Statement

Title: California Cybersecurity Integration Center Commander

The California Cybersecurity Integration Center (Cal-CSIC) is an integral part of the Governor's Office of Emergency Services' (Cal OES) Homeland Security mission. The Commander oversees and manages the Cal-CSIC, which is a multi-agency coordination center integrating all aspects of California's cybersecurity mission statewide. Under the general direction of the Deputy Director for Homeland Security, the Commander will direct the development of policies and processes for ensuring successful statewide Cal-CSIC operations, focusing primarily on conducting cybersecurity and cyber incident response operations, completing cyber threat analyses, and building cybersecurity partnerships with public and private entities. The Commander will work to resolve operations policy variances to ensure implementation of statewide programs and initiatives.

The Commander provides leadership and direction to the Cal-CSIC team in the development and implementation of organizational structures and associated policies and defines the Cal-CSIC's statewide responsibilities and roles in implementing cybersecurity programs. The Commander, working in close coordination with the State's Threat Assessment Center (STAC) Commander will manage the implementation of technology solutions to enhance the State's collection and automated dissemination of raw and finished cyber threat intelligence. The Commander will also serve as liaison with local, state, federal, non-governmental, and private counterparts for all cybersecurity-related issues. Must possess or be eligible to obtain and maintain a minimum SECRET clearance through TOP SECRET with Sensitive Compartmented Information eligibility, preferred.
