Competencies

The competencies required for this position are found on the classification specification for the classification noted above. Classification specifications are located on the California Department of Human Resource’s Job Descriptions webpage.

Job Summary

All California Department of Public Health (CDPH) employees perform work that is of the utmost importance, where each employee is important in supporting and promoting an environment of equity, diversity, and inclusivity, essential to the delivery of the department’s mission. All employees are valued and should understand that their contributions and the contributions of their team members derive from different cultures, backgrounds, and life experiences, supporting innovations in public health services and programs for California.

This position supports CDPH’s mission and strategic plan by creating innovative solutions, strengthening partnerships and collaborations, and embracing technology. The Information Technology Services Division (ITSD) leverages data and technology to advance goals and inform action and accountability.

Under the general direction of the Information Technology Manager I (ITM I), Informatics Data Exchange and Applications Section (IDEAS) Chief, the Information Technology Specialist II (ITS II) serves as the Senior Application and Database Developer and Administrator responsible for performing a wide variety of tasks requiring innovative problem solving for multiple information
technology (IT) systems and interfaces. The ITS II architects and implements technological solutions to database/data warehouse, interfaces and application systems including, but not limited to, development, technical system configuration, optimization and performance tuning, and problem resolution. The ITS II provides management advisement regarding enterprise strategy, policy, adoption, architecture, and maintenance of complex IT solutions, accounting for all aspects of mission critical products, database, various applications and interfaces (on-prem and in-cloud) through their lifecycle. The ITS II addresses all aspects of complex IT systems, that includes, administrative, security, customer education, and outreach aspects. The ITS II establishes effective working relationships with all stakeholders.

The ITS II ensures application architect and enterprise-wide shared on-premise and cloud application services align with CDPH standards and vision by designing technology solutions that enable the Department’s ability to make key service decisions that are backed by data and are focused on public health outcomes, while ensuring the most complex/critical information interoperability is established between other CDPH programs, state departments, federal programs, and external vendor Software as a Service (SaaS) service and in-cloud platform providers.

The ITS II performs duties within the Information Security Engineering, Software Engineering, System Engineering domains.

### Special Requirements

- ☑ Conflict of Interest (COI)
- ☐ Background Check and/or Fingerprinting Clearance
- ☐ Medical Clearance
- ☐ Travel:
- ☐ Bilingual: Pass a State written and/or verbal proficiency exam in
- ☐ License/Certification:

- ☐ Other: This position supports mission critical applications and databases and requires consistent and regular attendance, after hours and weekend work as needed.

### Essential Functions (including percentage of time)

30% Performs expert level application, interface, and database/data warehouse architect/systems design, development, optimization, performance tuning, configuration, and implements product life cycle support of software using state approved development standards. Collaborates with stakeholders to design and implement databases that address data management needs such as data capture, ETL (Extract, Transfer, Load), SSIS (SQL Server Integration Services), SSRS (SQL Server Reporting Services), data modeling, data integrity, data security, data access, and data exchange within the State of California and externally. Creates, enhances, and maintains IT software solutions using CDPH approved programming languages to meet department requirements and expectations with regards to efficiency and effectiveness. Ensures critical on-prem and in-cloud system services and architecture are maintained and operating at optimal efficiency (e.g., system interfaces, web services, end of day batch, backups and recovery, restoration, failover, clustering, replication, certificates, ETL). Troubleshoots, problem solves, handles and resolves the most challenging and difficult application issues that are time sensitive and publicly and politically visible. Works with all
levels of impacted staff (e.g. public, participants, vendors, county, state, control agencies, federal) and acts as a liaison between Program and IT Stakeholders.

30% Maintains and supports various clustered application and database platforms, on-prem and in-cloud, including, but not limited to, software installation and version upgrade, backup and restore, jobs setup and scheduling, etc. Reviews existing service monitoring tools, system health checks and alerts; updates as necessary and develops new health checks to further improve operations using scripting tools and platforms (e.g. Microsoft Log Analytics, Power BI, Structured Query Language (SQL) server, SnowFlake, PowerShell, JavaScript, VBScript). Perform and complete M&O (Maintenance & Operations) work using the Branch’s suite of technology tools, platforms, and programming languages (e.g. .NET Framework, VB.NET, ASP.NET, XML, JSON, Python, DevOps, Mulesoft, DataLake, AWS and Azure Cloud services, F5, DNS, LDAP, Power Designer, Cherwell, Visio, ServiceNow, Team Foundation Services).

20% Maintains knowledge of industry technologies, practices, and trends; makes recommendations to management on the adoption of new tools, platforms, processes, and procedures to improve service delivery and operational efficiencies. Responds to production incidents and calls; performs impact assessment; provides technical troubleshooting, research, analysis, and mitigation resolution to restore service. Ensures that management, program partners, help desk personnel, and internal and external stakeholders are kept informed with periodic updates on status of resolution. Conducts post incident root cause analysis. Participates in production incident debriefs, presents findings, and makes recommendations to management to prevent future incidents.

10% Stays current on statewide IT policies in accordance with the State Administrative Manual and Statewide Information Management Manual. Presents the system requirements to a wide variety of distributed computing systems experts at the state, local, federal level and with technical architecture consultants. Ensures CDPH application systems meet CDPH, State, and CDT (California department of Technology) security standards and requirements.

5% Assists in IT procurement activities by serving as a technical member on the evaluation and acquisition teams during the evaluations of draft and final project and system proposals. Assists in developing and maintaining application development requirements, developing proposal evaluation criteria, and developing responses to vendor questions to the Request for Offers, and other contract and projects documentations.

Marginal Functions (including percentage of time)

5% Mentors and trains peers in learning and performing system development life cycle functions to assume similar roles on future efforts. Performs other job-related duties as assigned.

I certify this duty statement represents an accurate description of the essential functions of this position. I have discussed the duties and have provided a copy of this duty statement to the employee named above.

I have read and understand the duties and requirements listed above, and am able to perform these duties with or without reasonable accommodation. (If you believe reasonable accommodation may be necessary, or if unsure of a need for reasonable accommodation, inform the hiring supervisor.)
