<b>20%</b>	<p><b>POSITION SUMMARY:</b>                      Under the direction of an Hydroelectric Plant (HEP) Technician Supervisor with guidance from the HEP Technician III, the incumbent performs routine and basic tasks on control, communication, electrical and mechanical equipment in connection with the operation and maintenance of State Water Project (SWP) generating/pumping plants, switchyards, water conveyance, and facilities.</p> <p><b>ESSENTIAL FUNCTIONS:</b>                      This position requires that the incumbent work cooperatively with others; maintain regular, consistent, predictable attendance, adjust priorities based on operational need and exercise good judgment. The specific essential duties are as follows:</p>			
<b>20%</b>	<p><b>Troubleshooting and repair:</b> Assist with analyzing, trouble-shooting and diagnosing Hardware and Software failures on equipment, systems and related components utilizing knowledge of proper operations and performance levels, fault isolation procedures, appropriate tools and test equipment, system isolation and safety procedures, technical documentation, drawings and schematics so that the failed equipment or component can be isolated and identified for repair or replacement. Participate in identifying appropriate materials, equipment and procedures to safely repair and restore equipment and system to operations, including testing and validation. This will require driving a vehicle on public roadways and on uneven terrain throughout the field division.</p>			
<b>20%</b>	<p><b>Installation and testing :</b> Assist with performing physical installation and testing of equipment, cables, system level assemblies, stand-alone components, sensors, transducers, protection devices and other components used for protection, support, monitoring and control within the SWP Power and Water facilities according to specifications, installation instructions, documentation packages, drawings and other related information to make electrical, mechanical and system connections and configuration settings. Tasks include following instructions and procedures; determining required materials, tools, equipment, safety procedures, and PPE's to perform installation and testing; set-up and configuration of test equipment and materials required for installation, calibration, testing and validation of alarms, annunciators, point settings, system</p>
