**California Department of Food and Agriculture  
Pest Detection/Emergency Projects Branch  
Agricultural Technician III (Seasonal)  
Duty Statement**

**I. Program/Position Identification**

The Pest Detection/Emergency Projects Branch is responsible for the early detection and prompt eradication of serious exotic agricultural pests. The Branch accomplishes its mission by conducting a statewide trapping program, staffed by county and state inspectors, for exotic insect pests; by implementing special surveys for significant agricultural pests and plant diseases for which traps are not available; and by providing emergency eradication services using the best available technology. The primary objective of the emergency project component is to quickly and efficiently eradicate incipient infestations of serious agricultural pests, thereby preventing permanent establishment and subsequent spread in California.

Under direction of the Senior Environmental Scientist (Supervisory) (SESS), the incumbent will independently perform the most complex range of field and office support duties, for various fruit fly delimitation programs, maintain fruit fly trapping routes, coordinate the application of pesticides, maintain pesticide inventory and vehicle fleet, oversee pesticide applications performed by outside vendors, perform plane inspections for Japanese beetle, fruit removal and tree removal, communicate with the public at educational public meetings, coordinate with other agencies, and perform various insect/disease surveys for targeted pests. These activities include working independently and in cooperation with other staff, overseeing treatment activities, preparing written reports, performing quality control inspections for treatment-survey-trapping programs, training new seasonal employees, and acting as the back-up trapper/applicator. The incumbent must be able to establish working relationships with those contacted during work using tact and interpersonal skills; cooperate with other staff members and leads in completing assigned work, communicating effectively verbally and in writing; work well under pressure while completing assigned work and meeting required deadlines.

## **II. Essential and Non-Essential Job Functions**

### **A. Essential Functions:**

#### **Function #1: Detection and Treatment Activities**

**35%**

- Safely operate and maintain State vehicles daily for travel to designated work areas locally and throughout the state.
- Perform the most complex range of field office support duties, deploy and service traps, perform visual surveys, or apply control measures for target pests such as but not limited to various fruit flies, Japanese beetle, European grapevine moth, and spongy moth.
- Plan, organize and maintain daily trapping routes, visual surveys, or treatment programs and monitor outside vendors to ensure compliance with Department policies and procedures, and State laws, rules, and regulations; enforce and implement new procedures or processes with seasonal employees, when necessary.
- Assemble equipment and mix chemicals using the appropriate protocols; assure that the Department is in compliance of all pesticide rules and regulations.
- Work with field staff in solving technical problems such as equipment breakdowns and trap deployment, using effective communication skills, knowledge, manuals, and/or facility operational procedures.
- Read maps to navigate to multiple locations when performing field activities. Must be able to draw maps to show exact geographic locations. Use Global Positioning System (GPS) technology to site register sample and packages samples separately to maintain sample and site integrity.

#### **Function #2: Documentation of Work Completed**

**35%**

- Prepare and complete accurate and detailed technical reports (daily, weekly, and/or as required) as associated with detection trapping, survey, and treatment activities, or other related activities.
- Carefully document address, host type and location of samples on property or field by drawing a map and/or using a GPS unit and on a Pest Submission Slip.

#### **Function #3: Collection and Submission of Target Pests**

**10%**

- Screen wet and dry traps for target pests (plant and insect). Examine contents of traps, which may contain hundreds of plant samples, insects and debris to make preliminary identifications of specimens, which resemble target pests.
- Once a suspect target pest is preliminarily identified, prescribed action is taken, which may include phone contact and/or return of the suspect target pest to the field office for official identification.
- Remove and collect samples, place in appropriate sample container and return to base at the appropriate time designated by the supervisor.

- Collect, process and package suspect plant and insect samples that are removed from foliage using various insect/plant collection tools and inspected for target pests.

**Function #4: Interaction with the Public**

**10%**

- Interact with public, Agricultural Commissioner's office, USDA, and staff from other agencies in a professional manner.
- Initiate contact with property owner or representative to conduct visual survey, place traps or apply pesticides. Develop a cordial relationship to enable continued use of the property for current and future surveys or trap placements.
- Briefly answer questions and responds to concerns about survey, detection and eradication programs at public meetings and when interacting with residents, and refer questions asked regarding gardening, health concerns, insect and disease inquiries, etc. to the proper agencies.

**Function #5: Office Work and Documentation**

**5%**

- Document hours worked on various programs and provide to supervisor or lead at the end of each day.
- Submit daily work summaries to supervisor or lead at the end of each day or when requested for reporting purposes.
- Relay information from supervisor or lead to other employees at the office.
- Perform vehicle inventory checks and submit accurate vehicle mileage logs.
- Ensure all formal original documents are complete and have signatures.
- Ensure all time sheets, sign-in sheets, exposure records, and other official documents are sent to supervisor or lead in a timely manner.

**B. Non-Essential Functions:**

**Function #1: Miscellaneous Duties**

**5%**

- Perform other job-related duties as requested by supervisor.

**III. Work Environment**

The duties of this position are primarily conducted outdoors. The incumbent works in extreme weather and temperature conditions. Changes in lighting such as alternating bright sunlight and dark shade are encountered. Noise levels constantly vary. Terrain encountered varies from smooth and stable to irregular and unstable. Incumbent may experience regular exposure to dust, pollen and moisture. Some trap types use a specific chemical insect lure; some of these lures may contain small amounts of pesticide. The work area can be urban or rural. The incumbent may drive, exit and re-enter the work vehicle numerous times during the workday.

The incumbent must have a valid driver's license and have a safe driving record as documented by the Department of Motor Vehicles. The incumbent must be able to apply pesticides, perform survey work, work well under extreme time constraints,

exercise good judgment, determine priorities, make appropriate well-thought-out decisions, allocate staff and resources to achieve maximum results, maintain focus under conditions of duress, and provide accurate assessment of rapidly changing situations (ex: multiple exotic pest detections requiring multiple operations).

The incumbent may be required to work overtime, weekends, and holidays. Travel to various locations throughout the State to attend meetings or trainings related to pest detection, and treatment and to assist other offices with detection and treatment efforts.

#### **IV. Employee's Statement**

##### **(Initial applicable statement)**

**California Department of Food and Agriculture  
Pest Detection/Emergency Projects Branch  
Agricultural Aide (Seasonal)  
Duty Statement**

**I. Program/Position Identification**

The Pest Detection/Emergency Projects Branch is responsible for the early detection and prompt eradication of serious exotic agricultural pests. The Branch accomplishes its mission by conducting a statewide trapping program, staffed by county and state inspectors, for exotic insect pests; by implementing special surveys for significant agricultural pests and plant diseases for which traps are not available; and by providing emergency eradication services using the best available technology. The primary objective of the emergency project component is to quickly and efficiently eradicate incipient infestations of serious agricultural pests, thereby preventing permanent establishment and subsequent spread in California.

Under the close supervision of the Senior Environmental Scientist (Supervisory) (SESS), the incumbent will work on entomological or plant pest field, laboratory or office setting in entomological and plant disease related work assignments of less difficulty. The incumbent in this position must be able to establish and maintain effective working relationships with those contacted during work, work well under pressure and in cooperation with other staff members in completing assigned work and meeting required deadlines.

**Classification:** Agricultural Aide (Seasonal)  
**Working Title:** Agricultural Aide  
**License Requirement:** California Driver's License  
**Position Number:** 014-636-0365-982  
**Division/Branch:** PHPPS, Pest Detection/Emergency Projects  
**Location:** Lompoc (Santa Barbara County)  
**Work Hours/Shift:** 40 hours per week  
Monday- Thursday, 07:00-17:30, possibly work  
overtime on Fridays and weekends  
**Date Prepared:** January 2025

**II. Essential and Non-Essential Job Functions**

**A. Essential Functions**

**Function #1 Trapping/Survey and Eradication Activities 50%**

- Safely operate and maintain State vehicles daily for travel to designated work areas locally and throughout the state.
- Follow established protocols for visual surveys, eradication and detection/delimitation trapping.

- Service various insect traps, perform visual surveys and insect sweeps, by visually inspecting target pest damage on local plant hosts, and conduct eradication treatments (mixing and application of spray materials).
- Inspect for, collect, process and package suspect plant and insect samples that are removed from plants and/or soil using various insect/plant collection tools.
- Read maps to navigate to multiple locations when performing field activities. Must be able to draw maps to show exact geographical locations by using Global Positioning System (GPS) technology to site register samples and package samples separately to maintain sample and site integrity.
- Conduct all work activities in compliance with Department policies and procedures, and State laws, rules, and regulations.
- Implement and follow new procedures or processes as directed by supervisor.

**Function #2 Documentation of Work Completed**

**25%**

- Keep daily reports of work completed, i.e. number of traps serviced, properties treated, acreage surveyed, and samples collected, and other topics as needed.

**Function #3 Collection and Submission of Target Pests**

**10%**

- Make preliminary identifications of specimens which resemble target pests.
- Screen wet and dry traps for target plant and/or insect pests.
- Examine contents of traps, which may contain hundreds of plant samples, insects and debris.
- Communicate with the field office and/or return suspect target pest to the field office for official identification once a suspect target pest is preliminarily identified.
- Carefully document address, host type and location of sample on property or field by drawing a hardcopy map and/or using a GPS unit and/or on a Pest and Damage Record (PDR).
- Handle suspect sample carefully to prevent damage that would make identification of the suspect more difficult. Sample is removed, placed in appropriate sampling container, and returned to base at the appropriate time designated by the supervisor.

**Function #4 Interaction with the Public**

**5%**

- Interact with public, Agricultural Commissioner's office, USDA, and staff from other agencies in a professional manner.
- Make initial contact with property owner or representative to conduct visual survey, place traps or apply pesticides. Develops a cordial relationship to enable continued use of the property for current and future surveys or trap placements.
- Briefly answer questions about survey, detection and eradication program, referring questions asked regarding gardening, tree diseases, etc. to the proper agency.

## **B. Non-Essential Job Functions:**

### **Function #1 Vehicle and Tool Maintenance**

**5%**

- Assist with transporting vehicles to service facility.
- Assist with performing daily vehicle safety and fluid level checks.
- Assist with cleaning the vehicle's interior and truck bed of insects, lures and other debris.
- Assist with cleaning, repairing and storing all survey equipment daily.
- Notify Supervisor when equipment needs repair or replacement.

### **Function #2 Miscellaneous Duties**

**5%**

- Perform other job-related duties as required by supervisor.

## **III. Working Conditions**

The duties of this position are primarily conducted outdoors. The incumbent works in extremes of weather and temperature. Changes in lighting such as alternating bright sunlight and dark shade are encountered. Noise levels constantly vary. Terrain encountered varies from smooth and stable to irregular and unstable. Incumbent may experience regular exposure to dust, pollen and moisture. Some trap types use a specific chemical insect lure; some of these lures may contain small amounts of pesticide. The work area can be urban or rural. Employee acts under the general direction of the Senior Environmental Scientist, but the Senior Environmental Scientist may not always be on site in the field.

The incumbent will be required to drive, exit and re-enter the work vehicle numerous times during the workday, must possess a valid CA drivers' license, and must maintain a driving record in good standing to operate a state motor vehicle safely and responsibly. Must be able to apply pesticides, work well under extreme time constraints, exercise good judgement, determine priorities, make appropriate well-thought out decisions, allocate resources to achieve maximum results, maintain focus under conditions of duress, and provide accurate assessment of rapidly changing situations (e.g., Multiple exotic pest detections requiring multiple operations).

Travel by State vehicle or other public transportation systems to various locations throughout the state may be required.
