Description of Duties (*Attach additional sheets, if necessary, and identify position information*)

Summarize the regularly assigned duties of the position by percentage in descending order. Do not combine distinct activities into a single percentage. Descriptive information should reflect variety and complexity of duties through: supervision exercised and/or received; responsibility for decision making and consequence of error; analytical requirements; special knowledge; skills or abilities required; level, type and frequency of public contact; and unusual working conditions (i.e., field work, bilingual services, etc.); and physical requirements (physical demands, environmental demands).

Percent of Time	Activity
	<p>Under the close supervision of the Senior Environmental Scientist (Supervisory), the Environmental Scientist performs professional scientific analyses and fieldwork associated with appropriate use of pesticides. Applies scientific methods and principles to perform environmental investigations, analyses, research and studies for compliance with toxic and hazardous pesticide restrictions. Provides oversight of enforcement compliance to maintain statewide uniformity. Incumbent generates, analyzes and evaluates scientific data for regulatory compliance with human health and environmental requirements, providing protections from pesticide use on human health, non-target vegetation, food safety, surface/ground water, wildlife, and air quality.</p>
30%	<p><u>ESSENTIAL FUNCTIONS:</u></p> <p>Coordinates and conducts multidisciplinary product compliance inspections and investigations at manufacturing facilities, pesticide dealers, retail locations, ports, wholesale distribution centers and online sellers. Conducts neutral-scheme and for-cause environmental compliance inspections/ investigations of pesticide products to determine compliance with Federal and/or State pesticide laws and regulations. Conducts United States Environmental Protection Agency (U.S. EPA) special requests, and investigates product related complaints or tips where pesticides are manufactured, sold, used or stored. Reviews pesticide label claims; collects photographic, documentary and physical evidence; prepares investigative reports of findings; issues violation notices for unregistered or misbranded pesticide products; and issues quarantine notices for contaminated commodities. Collects and submits pesticide product samples for laboratory analysis to determine if the active ingredient found in the product is compliant with sanctioned action levels. In preparation of pursuing enforcement actions, ensures that allegations of non-compliance are supported by scientifically gathered and generated data and that the data sufficiently serves as evidence to substantiate violations.</p>
30%	<p>Coordinates multidisciplinary environmental compliance research projects and collaborates with County Agricultural Commissioners (CAC), other agencies, industry, universities, growers, registrants, and public stakeholders to assess impacts of pesticide use on humans and the environment. Analyzes results of environmental investigations, making scientifically sound recommendations for needed environmental protection projects, regulatory changes, and enforcement legal actions. Acts as CAC liaison during human exposure and priority illness investigations. Performs statistical analysis of CAC local enforcement program activities to respond to trends and recommend mitigation measures for human and environmental protection. Determines CAC program effectiveness by evaluating restricted materials permitting, compliance monitoring, and enforcement response. Conducts oversight inspections and makes recommendations to CACs regarding use of appropriate scientific analytical methods and procedures to ensure consistent program integrity and statewide uniformity to protect human health and the environment.</p>
25%	<p>Assists in planning and conducting training of Federal, State or CAC personnel on topics related to the protection of the public, workers' health, and ecological resources. This includes oversight of the California Environmental Quality Act equivalency in issuing permits for the purchase and use of restricted pesticides, the State Implementation Plan to reduce release and formation of volatile organic compounds through complex fumigation use practices and controls, and the implementation of new respiratory protection, fieldworker safety, structural pest control programs to reduce impact on air quality, ground water, workers, and the environment. Serves as liaison within the Department and with external stakeholders to explain the nature of, and scientific basis for, laws and regulations protective of human</p>
