

JOB TITLE: Registered Nurse

General Statement of Duties: Provides professional nursing care and training for individuals following established standards and procedures. Assists other personnel in providing such care, assists physicians as directed, takes independent action within the RN professional scope of practice and legal limits, and performs nursing duties as assigned. May also assist in training other nursing personnel. Must maintain an active RN license and ACLS Certification. ACLS certification must be obtained within one year of employment. All employees at PDC are mandated reporters and must report all cases of suspected abuse.

Supervision Received: The RN may receive direct supervision from a Senior Psychiatric Technician (SPT), a Registered Nurse (Shift Lead) or a Nursing Person in Charge (NPIC) for an eight-hour period. During a medical emergency, the RN may receive supervision during a limited time frame from Central Nursing personnel (ACNS).

Supervision Exercised: The RN may be responsible for directing the care of individuals on the unit assigned for an eight-hour period and may also be in charge of other RNs assigned to that unit. During a medical emergency, the RN may be responsible for directing others in the care of the individual.

Essential Functions: The RN may be required to bend, stoop, and push a medicine/treatment cart. Must possess and maintain sufficient strength, agility, endurance, and sensory ability to perform the duties contained in this duty statement at all times, including during mentally and emotionally stressful and emergent situations encountered on the job, without endangering their own health and well-being or that of their fellow employees, individuals, or the public. **Must be able to lift 50 pounds without assistance; must be able to participate in individual containment, intervention or restraint. Must have the ability to work extended hours and various shifts; must float to all work areas within the facility if called upon to do so.**

Typical Working Conditions: On-going interaction with individuals. Potential exposure to communicable diseases, blood-borne pathogens, medicinal preparations, and other conditions common to a clinical nursing environment. Remain on a unit or training site for periods of time where an individual may be receiving training or services. Mandatory overtime may be required on a periodic and rotating basis. Working different units within the facility may also be mandatory. Must have the ability to set and shift priorities as needed. Work is performed at a level that requires the employee to be constantly alert of safety and security with individuals and the environment and ensuring individuals do not have any type of non-allowable items that could be used as weapons. May spend

time performing custody tasks which include escorting forensic individuals in the facility, which may include driving a State vehicle (golf cart, van, car, etc.); counting, distributing, and accounting for all utensils and other equipment/tools to prevent use as weapons; inspecting facilities to identify security breaches that could lead to the escape of a forensic individual; and observing and intervening in forensic individual behavior that may injure people, damage property, or signal impending escape attempts.
