Direction Statement and General Description of Duties: Under the administrative direction of the Information Technology Manager (ITM) I, the Information Technology Specialist II will perform duties related to Software Engineering and System Engineering, including, but not limited to Application Architect, Software Development, Product Management, Software Integration and Solution Design. The Information Technology Specialist II is responsible for designing, developing, and maintaining applications for the Enterprise Applications Branch (EAB).	
Percentage and Essential/Marginal Functions:	
45%	Software Development (E)

POSITION DUTY STATEMENT

	Acts as the expert-level team lead on projects of high complexity, in accordance to the Systems Development Life Cycle (SDLC) methodology. Architects, develops, implements, operates, deploys and maintains software systems by researching, developing, configuring, programming, testing and implementing business application services. Performs user centric design, enterprise architecture, service-oriented architecture, and cloud architecture and migration. Leads team members and coordinates alignment of team activities, development stacks, design methodologies and technical innovation toward the overall OMV and ISO strategies. Researches and develops proof-of-concepts for new software, technologies, components, and application frameworks.
25%	System Design (E) Provides system components capacity planning to ensure system sustainability. Develops strategic activities such as planning, designing, implementing, and testing applications and system software to contribute to the overall organization IT strategy. Partners with business leadership and other IT stakeholders to design and develop solutions while working closely with project leadership and business subject matter experts to implement solutions. Mentors, trains and supports staff in best practices, platform use, new technologies, and software development techniques.
15%	Emerging Technologies and Presentation (E) Maintains awareness of emerging methodologies and best practices in application and system development, evolving industry trends, standards, concepts and practices in compliance with DMV information security standards and practices. Develops and presents on technical topics to in-house and non-OMV audiences, including upper-level management groups. Participates in the evaluation and analysis of new legislation and service requests as they relate to EAB supported systems and services. Evaluates target platforms, technology stacks, development methodology and testability features of DMV systems and suggest improvements/enhancements and innovative ideas for implementations.
10%	Application/System Maintenance (E) Troubleshoots and maintains tasks to support EAB systems in development, unit test, integration test, system test, user acceptance test, training, and production environments. Support processes for the operation and administration of business applications and functions.
5%	Miscellaneous (M) Perform other job-related duties as required.

POSITION DUTY STATEMENT

Supervision Received: This position works under general direction of the Information Technology Manager I, on assignments in terms of broadly defined missions or functions, but plans, designs, and executes programs, studies, and other work independently. This position uses judgment and ingenuity in interpreting the intent of the guidelines that do exist and in developing applications to specific areas of work. This position is recognized as a technical authority and can make recommendations for projects and goals.

Supervision Exercised and Staff Numbers: This position works under general direction of the Information Technology Manager I, on assignments in terms of broadly defined missions or functions, but plans, designs, and executes programs, studies, and other work independently. This position uses judgment and ingenuity in interpreting the intent of the guidelines that do exist and in developing applications to specific areas of work. This position is recognized as a technical authority and can make recommendations for projects and goals.

Physical Requirements: Works in an office setting in artificial light and temperature control. Sits in a cubicle, primarily sedentary for extended periods of time. Operates a personal computer/laptop, telephone, fax machine, copier and other office equipment. Incumbent gives presentations and participates in meetings, conferences and workshops. Communicates with internal and external customers via e-mail, telephone, in person or virtually. Attends meetings on HQ campus and off campus. DMV operates 24x7. The incumbent may be required to carry a work cell phone and laptop. There may also be times when the incumbent is required to attend an out of town conference, or work evenings and weekends to maintain project schedules.

Special Requirements: Knowledge of current industry standards, best practices, and trends related to the software development lifecycle. Knowledge of the principles, methods, and procedures for designing, developing, optimizing, and integrating applications and systems in accordance with best practices. Knowledge of architecture, processes, programming, design, applications, and data environments, to implement the department's most complex projects and initiatives. Ability to develop and maintain standards and procedures to support and ensure consistency during the development, implementation, and maintenance of applications and systems. Ability to analyze needs and product requirements to create functional application and system designs. Ability to monitor and review software development activities to ensure compliance with specifications, requirements, and standards. Ability to serve as technical expert for application and system development. Comply with security policies and procedures established by the data owners and the Information Security Officer. Implement the technical means to preserve the integrity and security of the department's information assets and manage the risks associated with those assets. Advise the data owners and the Information Security Officer of control vulnerabilities and recommendations for alternatives that enhance data security and integrity for existing and developing systems.
