Sight/Hearing/Speech/Writing Ability: Adequate vision and hearing, as well as the ability to write and speak clearly, are required to effectively perform the essential job duties. The Office Technician will frequently use hearing, speech and written language to interface with staff, visitors, patients and community.

WORK ENVIRONMENT: The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

The Office Technician may work in an office/cubicle with his/her own desk area and computer, with fluorescent lighting and a thermostatically controlled environment.

MACHINES, TOOLS, EQUIPMENT, AND WORK-AIDS: The Office Technician utilizes a computer, a printer, a telephone, vertical filing cabinets, copy machines, shredder, fax machine, and the usual office supplies.

GENERAL POST ORDER ADDENDUM.

General requirements: Incarcerated/patients with disabilities are entitled to reasonable modifications and accommodations to CDCR policies, procedures, and physical plant to facilitate effective access to CDCR programs, services, and activities. These modifications and accommodations might include, but are not limited to, the following:

- measures to ensure effective communication (see below);
- housing accommodations such as wheelchair accessible cells, medical beds for incarcerated/patients who cannot be safely housed in general population due to their disabilities, dorm housing, or ground floor or lower bunk housing;
- health care appliances such as canes, crutches, walkers, wheelchairs, glasses, and hearing aids; and
- work rules that allow the incarcerated/patient to have a job consistent with his/her disabilities. Medical staff shall provide appropriate evaluations of the extent and nature of incarcerated' disabilities to determine the reasonableness of requested accommodations and modifications.

Equally Effective Communication: The Americans with Disabilities Act (ADA) and the *Armstrong* Remedial Plan require CDCR to ensure that communication with individuals with disabilities is equally effective as with others.

- Staff must identify incarcerated/patients with disabilities prior to their appointments.
- Staff must dedicate additional time and/or resources as needed to ensure equally effective communication with incarcerated/patients who have communication barriers such as hearing, vision, speech, learning, or developmental disabilities. Effective communication measures might include slower and simpler speech, sign language interpreters, reading written documents aloud, and scribing for the incarcerated/patient. Consult the ADA Coordinator for information or assistance.
- Staff must give primary consideration to the preferred method of communication of the individual with a disability.
- Effective communication is particularly important in health care delivery settings. At all clinical contacts, medical staff must document Whether the incarcerated/patients understood the communication, the basis for that determination, and how the determination was made. A good technique is asking the incarcerated/patient to explain what was communicated in his or her own words. It is not effective to ask "yes or no" questions; the incarcerated/patient must provide a substantive response indicating understanding of the matters that were communicated.
- Staff must obtain the services of a qualified sign language interpreter for medical consultations when sign language is the incarcerated/patients' primary or only means of communication. An interpreter need not be provided if an incarcerated/patient knowingly and intelligently waives the assistance, or in an emergency situation when delay would pose a safety or security risk, in which case staff shall use the most effective means of communication available such as written notes.

DECS: The Disability Effective Communication System (DECS) contains information about incarcerated/patients with disabilities. Every institution has DECS access and staff must review the information it contains in making housing determinations and providing effective communication.

Housing restrictions: All incarcerated/patients shall be housed in accordance with their documented housing restrictions such as lower bunks, ground floor housing, and wheelchair accessible housing, as noted in DECS and their central and medical files. All staff making housing determinations shall ensure that incarcerated/patients are housed appropriately. **Prescribed Health Care Appliances (including dental appliances):** Staff (health or security) shall not deny or deprive prescribed health care appliances to any incarcerated/patient for whom it is indicated unless (a) a physician/dentist has determined it is no longer necessary or appropriate for that incarcerated/patient,

	or (b) documented safety or security concerns regarding that incarcerated/patient require that possession of the health care appliance be disapproved. If a safety or security concern arises, a physician, dentist, Health Care Manager, or Chief Medical Officer shall be consulted immediately to determine appropriate action to accommodate the incarcerated/patient's needs.
